IT Engineer (Network) -Liège, Belgium

Introduction

We provide solutions to Broadcasters and TV Stations allowing them to produce live shows like Sport games or Music shows. For our Belgian office, we are looking for an IT Engineer.

Profile

- Bachelor or equivalent in IT/Computer Science
- 2 to 5 years of experience in an IT environment
- Sounds knowledge of network (administration, configuration, security)
- Experience selecting hardware components based on performance and compatibility targets
- Experience in HPC and GPGPU
- Structured mind, self-organizing with capacity to adapt to multiple tasks and priorities
- Good problems solver
- Team player with the ability to participate in the structuration of work processes
- Professional aptitude for technical English (read, write, spoken)
- Basic knowledge of IP video protocol and streaming concepts.
- Deployment experience with Linux, Docker, AI Stack (TensorRT), AWS is a plus

Job Description

The successful candidate will be part of Simplylive system valuation team in our Belgium office (Liege). His tasks will involve:

- Maintaining the IT infrastructure of the office
- Assisting the QA team in testing Simplylive software applications
- Advising the Product Management team on IT hardware validation and configuration
- Assisting the R&D and Support teams in resolving IT issues in relationship with Simplylive products
- When required, assisting the production team in the assembly and configuration of Simplylive products
- Configuration of router, network segregation and monitoring. VPN deployment

We offer

- A dynamic working environment using leading-edge IT technology
- A collaborative working environment within a young and motivated team
- A competitive package that can evolve with the candidate's skills and its contribution to the growth of the company
