

Multi-Channel USB Recorder  
& Web Streamer

# MMR-410

## Quad Channel, Multi-Destination Digital Video Recorder

The MMR-410 is a unique recorder that allows recording of media to multiple destinations as well as live streaming. It combines the option to record locally, store onto a network attached drive, record on removable USB drives (HDD or Keys), upload content to an FTP and live stream - all at the same time.

It includes 4 HD-SDI inputs with embedded audio and has been designed to be rack-mounted for easy integration in OB Vans and Television studios. It offers users and stakeholders the option to take away video content in an extremely easy and affordable way.

The MMR-410 is extremely easy to use and includes an exceptional user friendly interface. It is designed to replace DVD recorders and offer a much more reliable experience with its disk recording capacity.

The MMR-410 can record 4 video feeds in H264 at up to 10 Mbps. The video feed is then made available on USB sticks/HDD based on the user preference settings. The finalisation takes only a few seconds to complete. The content is then directly available on USB/HDD for convenient transport and use on other devices ( PC, Mac, ...)

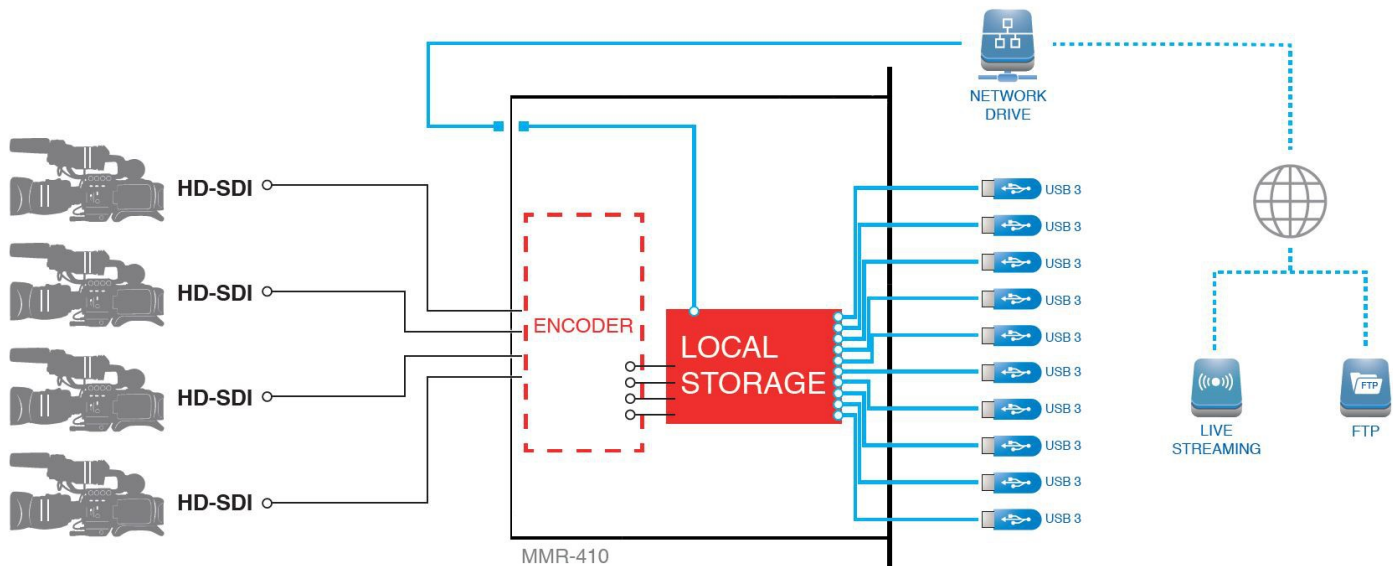

In addition to the USB capabilities the MMR offers other flexible functions to its users :

- Automatically records a safe copy of the content on the internal hard drive. This gives the user the possibility to make more than 10 copies, if necessary.
- Record a copy onto a network drive
- Upload the content automatically to an FTP
- Stream the inputs in RTMP or HLS to various cloud platforms

This is truly a versatile multi-purpose digital recorder for the broadcast industry.

## Main features

- Record 4 HD-SDI
- Encode in H264 up to 10 Mbps
- Live graphics overlay (logo, watermark)
- Audio selectable
- Record locally, on Local drive, USB Drive, network drive and FTP upload
- Live stream in H264 in HLS or RTMP

## Technical Specifications

### Video

- 4xHD-SDI input (1080 50i, 1080 59.94/60i, 1080 24p, 1080 25p, 1080 23.98p, 720 50p, 720 60p, 525i, 625i)

### Audio

- Embedded audio : 8 tracks per video channel (input)
- Recording : up to 2 user selectable tracks (uncompressed)

### Storage

- Internal storage 250GB (100 hours of HD recording)
- 10 USB3 connectors for external USB storage

### Network

- 1 Gigabit Ethernet port for connection to local area network

### Physical

- Main unit : 2RU chassis, 48cm depth – 19" rack wide

### Power

- Main unit : 110/230V 200W
