

Fast & Powerful SloMo | ViBox8 SloMo ^{4K}

Building on the powerful ViBox technology, the innovative 4K replay solution has arrived with the ViBox8 4K SloMo system. The ViBox 4K SloMo offers your production the ability to maintain the highest standards of replay technology at an affordable cost. This solution offers the same intuitive and instinctive touchscreen approach to create a user interface designed to harness the next generation of operators. Additionally, the option for a traditional dedicated slow motion controller integrated with the touch UI is available.

The ViBox8 4K SloMo interaction is natural and allows the focus to be on the editorial aspects while allowing a new, large base of operators to learn the craft of broadcast replay production.

ViBox SloMo Features:

- Multi-Camera slomo & playback
- Up to 6x 4K Camera recording
- Integrates Replays, Slomo and Highlights
- Quick learning curve with intuitive touchscreen control
- Option for dedicated replay controller

The ViBox8 4K SloMo also integrates many user configurable settings to customize the system based on the production at hand. Simplylive offers the new 4K standard for professional slow motion at a fraction of the cost.

Do not worry about learning the trade, it's all there in front of you. Focus on the editorial with the pioneering ViBox SloMo Solutions!
